

APPLICATIONS USED IN:

- MyChild
- StaffWatch
- WanderWatch
- UrgenTag

OVERVIEW:

The Bypass Keypad is installed close to an exit equipped with a door controller. A staff member can, by entering his/her unique PIN, use the keypad to either pass through a door controller field with a tag without generating an alarm or silence a local alarm at the door. The event and the identity of the staff member is recorded in the activity log.

FEATURES:

- Accommodates up to 1000 individual user PIN codes.
- 3 LED indicators: Standby, Alarm, Bypass.
- Audible alarm (adjustable volume).
- Operates even if communication is lost with the server.
- Mounts in single low-voltage retrofit bracket (supplied) or single gang electrical box (not supplied).
- Includes Keypad, RJ11 Cable, RJ11 Y adapter and single low voltage retrofit bracket.

SPECIFICATIONS:

Part Number: AR3KY01-030

Dimensions: 4.5 x 2.75 x 2.5" (11.5 x 7 x 6.5 cm)

Mounting: B11R Carlon retrofit box (supplied)

Input Voltage: 12 VDC @ 200 mA
