About StaffWatch

StaffWatch One-Sheet

STAFF
WATCH

StaffWatch is an electronic pani
button system for healthcare worker

FOR MORE INFORMATION CALL 1-800-776-732
OR EMAIL SALES@MCROBERTSTECH.CO

StaffWatch® AT-A-GLANCE

- Staff members wear small, lightweight tags with panic buttons.
- Tags auto-enroll when in proximity to a receiver.
- Tag assignment to staff member is done through StaffWatch software user interface.
- When the panic button is pressed, a panic alarm is sent from the tag to the receivers via RFID and from the receivers to the server over any standard Wi-Fi network.
- Tags emit a TLM (Tag Locating Message) every 16 seconds to ensure active supervision.
- The StaffWatch server can be either cloud-based or locally-hosted.
- The panic alarm shows its location on the floor plan in the StaffWatch software application and it can be automatically sent via email or SMS to first responders.
- Locate Tag and Locate All are functions in the StaffWatch software.
- StaffWatch is cost-effective due to the low-cost, plug-in, McRoberts Wireless Receivers that create the McRoberts RTLS architecture.
- McRoberts Technologies provides installation and training and 24/7/365 technical support, including proactive remote monitoring, for life.
